प्रस्तावना :

‘भाषा’ ही मानवाला लाभलेली नैसर्गिक देणगीच म्हणावी लागेल. भाषेच्या माध्यमातूनच मानव आपला दैनंदिन व्यवहार सुकर करत असतो. प्राचीन, मध्ययुगीन काळात भाषेच्या जोरावरच ग्रंथ पठण करून त्याचे जतन केल्या जात होते. म्हणजेच वाणी भाषा हे साहित्याचे मूळ साधन होय. प्रारंभी मानवाने आपल्या व्यवहार सुकरतेसाठी भाषा निर्माण केली. शब्द तयार केले त्याला संकेत लावले. पुढे हीच भाषा समृद्ध बनत गेली आणि प्रांतपरत्वे, जातीनिहाय, व्यवसायानुसार भिन्न-भिन्न स्वरूपाने भाषा बोलल्या गेली. त्यामुळे जगात हजारो भाषा उदयाला आल्या आणि त्या-त्या भाषेत साहित्य निर्मिती होत गेली. आणि पुढे भाषा हेच आपापल्या संस्कृतीचे अभिव्यक्ती साधन बनले.

वस्तुतः भाषेद्वारेच लोकांच्या जीवनातील अनेकविध प्रतीतांना अभिव्यक्ती लाभते. त्याच बरोबर आणखी, एक विशेष लक्षात घेण्यासारखे सत्य हे की, लोकजीवनातील प्रतीतांच्या संचिताचे हे वैभव पिढ्यानपिढ्याच्या वारसदारांना पोचविणारी ही भाषा म्हणजे त्या समाजातील, कोणत्याही एका वर्गाची निर्मिती किंवा एका समूहाची मिरासदारी नसते. समाजजीवनासाठी म्हणजे सर्वच वर्गांच्या दैनंदिन व्यवहारासाठी ती निर्माण केलेली असते आणि म्हणून प्रत्येक वर्गाच्या जीवनाचे स्वरूप आकाराला आणलेले असते. आजच्या प्रगत युगात देखील भाषे इतकी सर्वान्वेषी शक्ती दुसरी आढळणार नाही.

विषयांचे स्वरूप व महत्त्व :-

१ मे, १९६० रोजी मुंबईसह संयुक्त महाराष्ट्र मराठी भाषिक राज्य म्हणून उदयाला आले. तेव्हापासून मराठी ही राज्याची ‘राजभाषा’ झाली. आणि महाराष्ट्र हे मराठी भाषा बोलणारे राज्य म्हणून नावारुपाला आले. मराठी भाषेची खरी ओळख संत ज्ञानेश्वरांच्या अमृत वाणीने पहिल्यांदा महाराष्ट्राला

झाली. मराठी भाषेची महती विषद करतांना संत ज्ञानेश्वर म्हणतात की, “माझे मऱ्हाठीचिचे कौतुके परि । अमृतातेही पैजा जिंके । अशा प्रकारची अमृत वाणी म्हणजेच मराठी होय, तेव्हा विषयाचे स्वरूप फार व्यापक आहे. तथापि मराठी भाषेचे महत्त्व त्याहून अधिक आहे. याचे कारण असे की, कोणतीही भाषा ही त्या-त्या राज्याची, प्रांताची तथा विभागाची तेथील माणसांची ओळख निर्माण करत असते. म्हणूनच कोणत्याही भाषेचे महत्त्व हे त्या-त्या राज्यासाठी तथा तेथील समाज समूहासाठी अनन्यसाधारण असे असते.

‘ विशेषतः मराठवाडा’ ही संताची भूमी आहे. या भूमीत अनेक संत, पंत, महंत तथा समाजसुधारक होऊन गेले. त्यांनी आपल्या साहित्यातून कृतीतून या प्रांतांची वेगळी अशी ओळख निर्माण केली. संत नामदेव, ज्ञानेश्वर, एकनाथ, निवृत्ती, सोपानदेव, संत शेख महंमद, मुक्ताबाई, वेणाबाई, जनाबाई, यांच्या संतवाणीने महाराष्ट्राला अध्यमिक, धार्मिक आणि सामाजिक प्रबोधनात्मक ज्ञान दिल्याने ही भूमी आणखीनच उजळून निघाली. अशाच या भूमीमध्ये ऐतिहासिक औरंगाबाद नगरी आपले ऐतिहासिक महत्त्व जपून आहे. ते म्हणजे औरंगाबाद ही मराठवाड्याची राजधानी, राज्याची पर्यटन राजधानी तसेच जगप्रसिद्ध अजिंठा, वेरुळ लेणी, बीबी का मकबरा, यामुळे औरंगाबाद अशिया खंडातील अतिशय प्रसिद्ध असे शहर ठरले आहे. अशा या औरंगाबाद शहराचा आधुनिक कायापालट करणारे नवीन औरंगाबाद शहराचे शिल्पकार, हिंदु-मुस्लीम एकतेचे पुरस्कर्ते, आंतरराष्ट्रीय ख्यातीचे विचारवंत पॅ.डॉ. रफिक झकेरिया यांनी मौलाना आझाद कला, विज्ञान व वाणिज्य महाविद्यालयाची स्थापना १९६३ साली रोजाबागेत करून मुस्लीम समाजासह इतर लोकांच्या शिक्षणाची सोय संस्थेच्या रुपाने केली. या संस्थेने आजवर खुप विद्यार्थी घडवले संस्थेचे अनेक विद्यार्थी देशात आणि परदेशात मौलाना आझाद एज्युकेशन ट्रस्टचा लौकिक सांगत आहे. हे या संस्थेचे विशेष म्हणावे लागले.

कार्यक्रम के अंतिम पड़ाव में हिंदी भाषा के प्रचार और प्रसार के लिए छात्रों को प्रोसाहित करने के लिए मा. प्रधानाचार्य मजहर फारुकी सर, IQAC प्रमुख अदिति मैडम, प्रमुख

The COVID-19 pandemic continues to have significant impacts on mariners and the global shipping industry. In addition to the direct health risks posed by COVID-19 infection, maritime personnel face additional physical and mental-health stressors from restrictions on crew changes, shore leave and repatriation of seafarers.

The new realities of working from home, temporary unemployment, home-schooling of children, and lack of physical contact with other family members, friends and colleagues take time to get used to. Adapting to lifestyle changes such as these, and managing the fear of contracting the virus and worry about people close to us who are particularly vulnerable, are challenging for all of us. They can be particularly difficult for people with mental health conditions

Go easy on yourself if you're experiencing more depression or anxiety than usual. You're not alone in your struggles. Maintain a routine as best you can. Even if you're stuck at home, try to stick to your regular sleep, school, meal, or work schedule. This can help you maintain a sense of normalcy.

How to support your immune health and mental health during COVID-19

The COVID-19 pandemic has shed light on the importance of mental health and raised questions about how immune systems work. At How to Support Your Immune Health and Mental Health During COVID-19,.

Healthy people, healthy planet: That's population health

The COVID-19 pandemic has revealed how interconnected our health is with the health of those around us, as well as highlighting systemic inequities that affect the well-being of entire communities

Bereavement, isolation, loss of income and fear are triggering mental health conditions or exacerbating existing ones. Many people may be facing increased levels of alcohol and drug use, insomnia, and anxiety.

Meanwhile, COVID-19 itself can lead to neurological and mental complications, such as delirium, agitation, and stroke. People with pre-existing mental, neurological or substance use disorders are also more vulnerable to SARS-CoV-2 infection—they may stand a higher risk of severe outcomes and even death.

ABOUT GLOBAL WOMEN'S BREAKFAST (GWB)

You are invited to the IUPAC Global Women's Breakfast! The Global Breakfast is an event that happens on a single day in February of each year in conjunction with the U.N Day of Women and Girls in Science. The aim is to celebrate the accomplishments of Women in Science and to inspire younger generations to pursue careers in science. The theme for 2022 is "Empowering Diversity in Science". Women and men from all types of science organizations working in all areas of science come together to share breakfast either virtually or in person. A central goal is also to establish an active network of both men and women to overcome the barriers to gender equality in science. The Global Breakfast facilitates the formation of communities on a local, regional, and international scale to effectively share ideas and strategies for progress.

Awareness Campaign on viral diseases 2021-2022

COVID-19
The virus associated with the outbreak originated in China has been designated as a new respiratory syndrome coronavirus (SARS-CoV-2). The disease caused by virus is now officially called COVID-19.

HOW mRNA COVID-19 VACCINES WORK?

Understanding the virus that causes COVID-19.
SARS-CoV-2 is a virus that causes COVID-19. It is a member of the coronavirus family. It has a single-stranded RNA genome. It has a lipid bilayer envelope. It has spike proteins on its surface. It has membrane proteins on its surface. It has nucleocapsid proteins inside.

WHAT IS mRNA?
mRNA is a genetic code that tells your body how to make proteins.

WHAT IS IN THE VACCINE?
The vaccine is made of mRNA wrapped in a coating that makes it easy to inject and safe for the body.

HOW DOES THE VACCINE WORK?
The mRNA in the vaccine teaches your cells how to make proteins that are like the spike proteins on the virus. This helps your body learn to fight the virus.

My name is SARS-CoV-2 and I cause disease COVID-19.

I have made many people suffer. I have made many people sad. I have made many people angry. I have made many people hate me. I have made many people love me. I have made many people fear me. I have made many people respect me. I have made many people love me. I have made many people hate me. I have made many people fear me. I have made many people respect me.

COVID-19

Hey!
Corona virus is
Here...

waves of

Since I was getting bored I started
disenfranchised my family by involving my
sister Mary. Various (all) have seen
over the course of the pandemic. Some spread
around the world, while others quickly faded
away or were supplanted by others.

My first variant of concern was Alpha variant, reported from
from Sep 2020 with range lineage B.1.1.7 and it is estimated to be 50%
more transmissible than my original Wuhan strain.

Beta variant was identified in South Africa, Pango lineage B.1.351 became variant of concern in Dec 2020.
Gamma with Pango lineage P.1 was first detected in Brazil in Jan - 2021.

Then came Delta variant identified in India in 2020. Then in US it quickly surged & became the predominant variant accounting 99% of cases soon it was considered as "variant of concern" by WHO & CDC because it was easily transmitted & as of Sept-2021, there's resurgence in all countries across the continent.

I was first reported in Dec-2019 in
suchan city, china. Since then I have to travel
\$ spread to entire world. later I moved
to Europe where I caused havoc in Italy
Spain & France. By March I covered every
continent in India first case was reported
in Kerala on Jan-27, 2020
causing 3 cm + 1.07 mm with 226+
death southern 2020

3C's are useful to spread myself easily

- 1 - Crowded Places
- 2 - close-contact settings especially where people gather together

But soon they detected
Symptoms like Fever, dry
itchiness. Some of my relatives
have rashes & flares. Many
are, I think, on diazepam
or some other drug. I
it will be helpful
older people & those with
medical problems
not problems or serious
in some cases.

Causes

Dengue is caused by any one of
4 types of dengue viruses. You can get
dengue fever from being around an infected
person. Instead, dengue fever is spread
through mosquito bites. The 4 types of
mosquitoes that often cause the virus are
A. aegypti and *A. albopictus*.

New Variant Discovered

11 Indian states, including Kerala,
Telangana, Maharashtra, UP and
Odisha have recorded a staggering
spike of dengue infections in the past
18 months. As per official reports
of the four serotypes of dengue virus
(DENV-1, DENV-2, DENV-3, DENV-4)
the current one is DENV-2, which is
not just posing a severity
in cases but also leading to more
complications.

DENGUE VIRUS

Symptoms

Symptoms include high fever,
headache, rash and muscle & joint
pain. In severe cases there is
serious bleeding and shock, which
can be life threatening.

Treatment

No specific antiviral agents exist
for dengue. Supportive care is advised.
Patients should be advised to stay hydrated
to avoid aspirin, aspirin containing drug
or other nonsteroidal anti-inflammatory
drugs because of their anticoagulant
properties. The best option of
treat the symptoms are acetaminophen
or Paracetamol.

New Dengue Vaccine

A new dengue vaccine for use in children
aged 9-16 yrs with lab confirmed
previous dengue infection is in living areas
where dengue is endemic (common). Endemic
areas include some US territories &
fully associated states.

Reports on Dengue

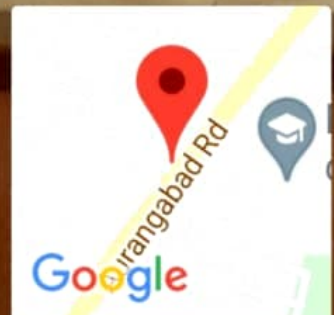

The no. of dengue cases reported
to WHO increased over 3 fold over
the last two decades, from 505,450
cases in 2000, to over 5.2 million in
2019. Reported deaths between the
year 2000-2019 increased from 748 to
4032. In India, the first epidemic
of clinical dengue-like illness was reported
in Madras (now Chennai) in 1750. It first
serologically proved epidemic of DF occurred
in Calcutta (now Kolkata).
Dengue outbreaks: From Uttar Pradesh to
M.P. viral fever outbreaks have across India.
However UP is the worst affected state
from dengue.

RISK FACTORS

- Age - Younger children tend to have more severe illness.
- Living in crowded conditions - People who work or live with many other residents such as nursing homes, military barracks.
- People who are living in the hospital who are at higher risk.
- Weakened Immune System - People whose immune system is weak can get flu or cold easily.

CONTROLLING THE SPREAD OF INFECTION

- Wash your hands - Washing your hands often with soap and water for at least 20 seconds is an effective way to stop the spread of germs.
- Avoid touching your face - Don't touch your eyes, nose and mouth.
- Cover your mouth while coughing or sneezing - Cough or sneeze into a tissue or your elbow.

Influenza

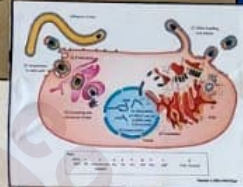

Introduction :->

Influenza is a communicable viral disease that affects the upper and lower respiratory tract. Influenza is an infectious viral illness. The name "influenza" originated in 15th century Italy, from an epidemic attributed to "influence of the stars." Influenza B virus (IBV) and Influenza C virus (ICV) primarily infect humans, and Influenza D virus (IDV) is found in cattle and pigs. IAV and circulate in human and cause seasonal epidemics, and ICV causes a mild infection, primarily in children. IDV can infect humans but is not known to cause illness. There are 3-5 million severe cases annually, with up to 650,000 respiratory-related deaths globally each year.

Symptoms :->

Include fever, chills, muscle aches, cough, congestion, runny nose, headaches and fatigue, sore throat, vomiting and diarrhea. Symptoms usually appear from one to four days after exposure to the virus, and they last five to seven days. For people who've had a flu shot, the symptoms may last a shorter amount of time, or be less severe. For other people, the symptoms may last longer. Even when symptoms resolve, may last continue to feel fatigued. Complications of flu can include bacterial pneumonia, ear infection, sinus infections and worsening of chronic medical such as congestive heart failure, asthma or diabetes.

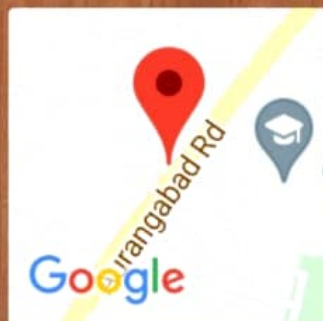

Preventions :->

The best way to prevent influenza is to get a flu vaccine every year. The influenza virus is constantly changing. Each year, scientists work together to identify the virus strains that they believe will cause the most illness, and a new vaccine is made based on their recommendations. Fluzone High-Dose is a vaccine indicate for active immunization for the prevention of influenza A type viruses and type B virus contained in the vaccine. Other ways to prevent spreading this disease include: washing your hands regularly, avoid close contact, cover your mouth and nose, avoid touching your eyes nose or mouth.

"SMALL BITE BIG THREAT"

Dengue Virus

Dengue fever, dengue is mosquito-borne viral illness caused by the Dengue virus. This virus is spread by female mosquitoes. These mosquitoes generally bite during the day but can also bite at night. Both adults and children can catch this virus. Symptoms are found at least 4-10 days after being bitten by an infected mosquito.

TREATMENT for DENGUE
Till today, there is no definite treatment of Dengue. Medicines to relieve Dengue symptoms are given. The doctor may generally recommend regulating the fever and pain by using paracetamol. Avoid the use of Aspirin and other pain killers as they can cause bleeding. Rest and plenty of fluids are also recommended. Severe cases may require hospitalization and blood transfusion.

SYMPTOMS OF DENGUE

A MOSQUITO AWARENESS

In India, the first epidemic of Dengue was recorded in 1780 and the first virus isolated in 1950. In India, the first epidemic of Dengue fever (DF) occurred in Calcutta (now Kolkata) and the first case of DENV in India was reported in 1963-1964.

DO'S AND DON'TS OF DENGUE

1. Remove water from coolers and other small containers at least once in a week.
2. Chemical can be used to destroy adult mosquitoes during transmission season.
3. Do not wear clothes that expose arms and legs.
4. Use mosquito nets or mosquito repellents while sleeping during day time.
5. Do not wait to call a doctor. If you experience any of the above symptoms, consult a doctor immediately. The treatment is cure of the complications.

Hit The Bite. Save A Life.

PREVENTION OF DENGUE

Prevention of Dengue is possible. You can do this by removing stagnant water and long-lived breeding places of mosquitoes. Use mosquito nets and repellents. Wear long-sleeved clothes and long trousers. Use mosquito coils and candles. Use mosquito traps. Use mosquito screens on windows and doors. Use mosquito nets on beds. Use mosquito coils and candles. Use mosquito traps. Use mosquito screens on windows and doors. Use mosquito nets on beds.

Maulana Azad College of Arts, Science & Commerce, Aurangabad
Report of activity for submission to IQAC

Name of the event: - Dr. Ahmed Zaheer Lecture Series

Date: - 16/12/2021 **Time:** - 5:00 – 6:00 PM

Venue: - Online Lecture

Speaker: - Dr. Ashfaq M. Khan

Number of Participants: - 35

Type of Activity: - Extracurricular

Extension: - Teaching Staff and Students of B.Sc. and M.Sc.

Details of the Programme:

Goals and Objective: - Environmental awareness

Highlights of the Programme: -

The Great Pacific Garbage Patch is a collection of marine debris in the North Pacific Ocean. Also known as the Pacific trash vortex, the garbage patch is actually two distinct collections of debris bounded by the massive North Pacific Subtropical Gyre. Dense debris can sink centimeters or even several meters beneath the surface, making the vortex's area nearly impossible to measure. Microplastics of the G P G P can simply make the water look like a cloudy soup. Turtles, too, are put in danger by marine debris. Turtles can easily be entangled in discarded fishing nets or mistake the gelatinous texture of plastic for a jelly, their favorite food. Garbage patches are found in the calm, stable centers of many of the world's ocean gyres. Even smaller bodies of water, such as the Mediterranean and North Seas, are developing their own garbage patches along heavily trafficked shipping lanes.

Relevance and Outcome: -

Understand and evaluate the global scale of environment problem.

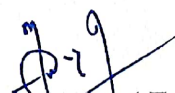

Programme Coordinator: - Prof. Sayed Sultan

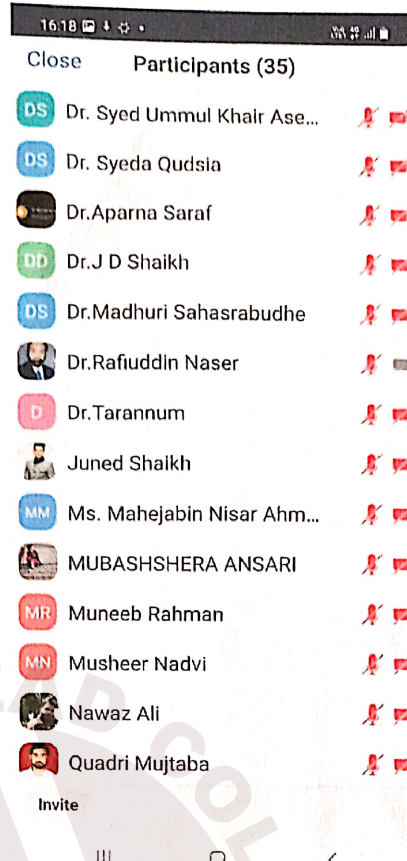

Feedback analysis: - To put the world on track and end plastic pollution.
