**Activity Details:**

Folic acid is one of the B vitamins found in foods such as leafy green vegetables, fruits, dried beans, and peas. A synthetic form of folic acid is used in dietary supplements and fortified foods. Folic acid acts by helping the body produce and maintain new cells. In particular, red blood cell formation is dependent upon adequate levels of this vitamin. Folic acid deficiency is a known cause of anemia in both adults and children. Folate is said to promote regular ovulation and increased progesterone levels in the second half of the menstrual cycle. Folic acid supplements won't relieve heavy periods. The problem with having heavy periods is that can develop anemia,

a condition in which body doesn't have enough healthy red blood cells to carry adequate oxygen .  
Folate may also help cells resist changes in their DNA associated with the development of cancer.

On account of Women's day distribution of 30 tablets per student and staff ( female) was done.

**Report of activity for submission to IQAC**

Name of the Event / Activity/ speaker: Distribution of masks and sanitizers

Date: -04/03/2021 Time: - 12 to 02 PM Venue: - Savitribai Phule Nagar and Bhimraj Nagar

Number of beneficiaries: 100                      Type of activity: Extracurricular

Extension: College committee activity.

Details of the Programme:

Goals and objectives: To make them aware about our society's situation • To make them capable of handling this difficult situation by providing them with the necessary resources such as masks and hand sanitizers and making them aware about the same.

Highlights of the programme

The said event was conducted in Savitribai Phule Nagar and Bhimraj Nagar, Himayat Bagh in Aurangabad where there are many people who are needy and who belong to underprivileged sections of society. The target population were people from all walks of life. The place acts as a dwelling place for these people in a sense that it houses people together who belong from different backgrounds and strata of society mostly from the underprivileged sections of society. They live together in the same place. We thought that it would be ideal to conduct the campaign here since majority of the people living there belong from disadvantaged sections of the society and hence are uneducated and unaware of their rights and duties and more importantly the current situation. We took help from the notes and posters which we had prepared before coming for the campaign and explained them the current situation which we are going through and how important it is for all of us to fight this situation i.e., the pandemic together and keep ourselves immune from the virus. Furthermore, we also explained the redressal mechanisms they can avail if they contract the virus or if any close relatives or friends of theirs get the virus or meet a Covid positive person. After

explaining them the same, we donated masks, hand gloves and hand sanitizers to them which we brought along with us.

Relevance and outcome:

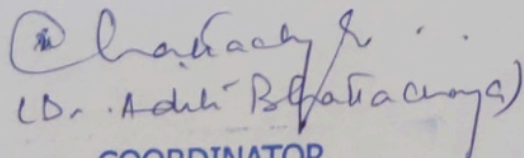

The objective could be better served and achieved if there were a greater number of volunteers participating since this increases the support and spreads the message much faster to a wider audience but anyhow the programme was a success and we were able to educate a significant amount of people about the current pandemic situation.

Feedback analysis (Comments/suggestions)

The reaction of the audience was very encouraging and positive. They were thankful of the things distributed to them and were pleased to know the information given to them. They were unaware about this initially and were benefitted immensely by this awareness drive.

## Letter of Appreciation

Dear Dr.Mazhar Ahemad Farooqui,

Greetings from the Pledge for Life Team.

Experts have determined that spitting spreads the Coronavirus. The primary cause of spitting in public places is chewing tobacco (gutkha, khaini, etc) which create an excess of saliva and the urge to spit. Government of India, under the Disaster Management Act 2005, has given the order to stop spitting in public places in every Directive. The Hon'able Prime Minister, Shri Narendra Modi, himself, urged the public not to do so too.

Along with the NSS, we launched the **Spit Free India Movement** on 24<sup>th</sup> April 2020 and it has been a great success. The Ministry of Youth Affairs has appreciated it and this is now becoming a Spit-Free India movement.

We would like to thank you and your National Service Scheme (NSS) unit, under the dynamic leadership of your Program Officer Dr.J D Shaikh for supporting this campaign. Your NSS Volunteers have created awareness on the issue by getting people to fill in a mobile weblink. Your NSS Unit has, till 26<sup>th</sup> January 2021 got 578 entries in the weblink.

This timely action is saving the spread of Covid-19 as well as reducing the usage of chewing tobacco. We look forward to your College's support in this movement by creating awareness in thousands more of students and general public.

Thank you for your service to society,

**Sanjay Seth**
